SECTION C - DESCRIPTION/SPECIFICATIONS/WORK STATEMENT

Scope of Work

C.1 Introduction: This is a research and development program to validate the application of advanced vacuum assisted resin transfer molding (VARTM) technology to the manufacture of tactical (wheeled) vehicle sheet steel parts and assemblies. Advanced material, process, sensor-based intelligent process control (IPC), and low-cost tooling concepts that are uniquely suited for VARTM shall be integrated to conduct both manufacturing trials and manufacture of prototypes for field-service evaluations.

C.2 Objective: The contractor as an independent contractor, not as an agent of the Government and within schedules and constraints of the contract shall validate the application of advanced Vacuum Assisted Resin Transfer Molding (VARTM) technology to the manufacture of tactical (wheeled) vehicle parts and assemblies. Composite materials will be used for parts that are normally manufactured using sheet metal. Accordingly, the contractor shall validate the application of VARTM and conduct manufacturing trials and subsequently manufacture and prepare prototypes for installation and testing on fielded army vehicles. The contractor shall also develop, assess and validate the application of a business case model intended to define the advantages and disadvantages to include addressing any issues of affordability of VARTM molding fiber reinforced composite body parts compared with the standard sheet steel parts typical of the current army inventory. The full spectrum ranging from the characteristically low and variable manufacturing quantities of spare/repair parts acquisitions to the O.E.M. original production scenario shall be examined.

C.3 Wheeled Vehicle Sheet Metal Parts and Assemblies: The Government shall provide the following technical data packages as Government Furnished Information (GFI) and parts listed below as Government Furnished Equipment (GFE) respectively. The GFE listed below consists of 3 fender sets, 2 engine compartment hoods and 1 cargo bulkhead. Note: For the HMMWV engine compartment hood, only the left and right front corners are the areas of interest and will be referred to as fenders in the paragraphs below:

Technical Data Packages (TDPs) for the fenders, engine compartment hood and cargo bulkhead listed below.

One (1) M939 vehicle, front right fender and front left fender (fenders only)

One (1) M35A3 vehicle, front right fender and front left fender (fenders only)

One (1) HMMWV vehicle, rear right fender and rear left fender (fenders only)

One (1) HMMWV engine compartment hood

One (1) M35A3 engine compartment hood

One (1) HMMWV cargo bulkhead

C.4 Overview: The total performance period is 20 months. This time period includes performing the tasks listed below including a twelve (12) month Government conducted field service evaluation listed in C.4.4.

C.4.1 Manufacturing Trials: The contractor shall conduct trials to develop process sensitivities, limitations and optimum process conditions for each of the parts/assemblies identified by the government in paragraph C.3.

C.4.1.1 Process Plans: For each of these parts, the contractor shall develop a process plan to VARTM the architecture of the composite version of the steel metal parts provided as GFE as listed in paragraph C.3. The process plan shall serve as the basis for development of a discrete event industrial simulation and business case model representative of the preparation and manufacture of each part. The process plan shall include: rapid, low-cost tooling approach, tool fabrication, tool preparation, resin system(s) preparation to include mixing and delivery, preform definition, fabrication and layup, bagging/venting and infusion, demolding, and secondary finishing to include trimming, drilling, priming, painting, installation of sub-assemblies, packaging, shipping and any other processes or actions necessary to develop a comprehensive, complete and accurate plan.

C.4.1.2 Low Cost Tooling: The contractor shall develop and prove out via manufacturing trials; their recommended low-cost tooling approach (s) for each part configuration.

C.4.1.3 Intelligent Process Control (IPC): The contractor shall demonstrate functional capability in the intelligent process control system by conducting six (6) manufacturing trials. Trials shall be conducted which manipulate the computer algorithms to gain the manufacturing insights into process sensitivities and limitations when applying the VARTM process to sheet steel replacement parts and assemblies.

C.4.1.4 Resin Infusion: The contractor shall conduct dual manufacturing trials, with and with/out the intelligent process control system (IPC) functioning for the infusion portion of the process. For each part/configuration, the contractor shall develop a sketch/map which identifies sensor locations; either tool mounted, bag mounted or insitu within the part. The IPC system shall be comprehensive to include all portions or phases of a typical infusion process and shall have the capability for the operator to over-ride any particular phase or portion of the cycle. The quantitative data recorded from the IPC shall be

the basis for populating the discrete event simulation and business case models.

C.4.2 Form, Fit and Function (FFF) Trials: The Government shall conduct FFF trials. The contractor shall provide two (2) technical personnel to observe, provide recommendations and guidance to the Government conducted installation trials designed to physically integrate the 4 fender sets, 1 engine compartment hood and 1 cargo bulkhead (as listed in C.3) into an existing fielded army vehicle. These trials shall determine if any changes are required before field-service evaluation articles are manufactured and shipped to the field for evaluation. These trials shall also be the basis for developing or validating templates required for drilling holes, cutouts, providing bosses or other interface requirements.

C.4.3 Prototype Manufacturing: The contractor shall manufacture a total of 500 parts consisting of: 400 fenders, 50 M35A3 engine compartment hoods and 50 HMMWV cargo bulkheads. Quantitative data shall be recorded for each manufacturing operation for each part sufficient to be used to populate the simulation and business case models. The 500 parts are listed below:

One Hundred fenders (Fifty front right fender and Fifty front left fenders from the M939 vehicles)

One Hundred fenders (Fifty front right fender and Fifty front left fenders from the M35A3 vehicles)

One Hundred fenders (Fifty rear right fender and fifty rear left fenders from the HMMWV vehicles)

One Hundred fenders (Fifty left and right fenders from the HMMWV engine compartment hood)

Fifty (50) M35A3 engine compartment hoods

Fifty (50) HMMWV cargo bulkheads

C.4.3.1 Secondary Finishing: The contractor shall conduct all necessary secondary finishing of the fenders molded above. This shall include trimming to final shape/geometry or periphery, surface preparation for priming, priming and top coat painting with army accepted CARC (Chemical Agent Resistant Coating) paint systems.

C.4.3.2 Hardware Outfitting: The government shall furnish all electrical, mechanical, pneumatic, or hydraulic hardware for each of the 4 vehicle fender sets, one cargo bulkhead and one engine compartment hood required in order to integrate the composite parts into the field test vehicle. The list of specific GFE hardware is identified in paragraph C.7.0 below. The contractor shall integrate/install all of the Government provided mechanical, electrical, pneumatic or hydraulic hardware into the composite field test prototypes prior to packing and shipment.

C.4.4 Field Service Evaluations: The government shall conduct a twelve (12) month field service evaluation of the fenders, bulkhead and hood manufactured in C.4.3. The contractor shall perform the following in support of the Government field service evaluation:

Package and ship the 500 piece parts as listed in C.4.3 to Fort Irwin, Ca. The packaging shall be capable of serving as a storage container for removed metal parts and also be suitable for return shipment of composite piece parts upon completion of the field service evaluation.

At Fort Irwin CA, remove existing metal parts and place them in the shipping containers.

Install the composite replacement parts.

Conduct four (4) quarterly on-site inspections at Fort Irvin CA, to include visual inspection, documenting findings with photographs and text and recording anecdotal/qualitative soldier comments/assessments.

At the completion of the field service evaluation, remove the composite parts and re-install the original metal ones.

Remove the GFE hardware from the composite parts and ship the GFE back to TACOM.

C.4.5 Discrete Event Industrial Simulation and Business Case Models: The contractor shall develop and/or apply computer-based models that specifically represent the Vacuum Assisted Resin Transfer Molding (VARTM) process and the Sioux manufacturing industrial infrastructure. Simulation and modeling trials shall be performed, populated with data obtained from the Manufacturing Trials of C.4.1 and the Prototype Manufacturing in C.4.3 to evaluate the profitability of army sheet metal spare/repair parts acquisitions of parts manufactured in the Sioux Manufacturing VARTM cell. Models and results of modeling and simulation trials shall be documented in the final report for the contract deliverable listed in C.6.0 Contractor's Progress, Status and Management Report (DI-MGMT-80227).

(d) Prechallenge request for information.

(1) The Contracting Officer may request the Contractor or subcontractor to furnish a written explanation for any restriction asserted by the Contractor or subcontractor on the right of the United States or others to use technical data. If, upon review of the explanation submitted, the Contracting Officer remains unable to ascertain the basis of the restrictive marking, the Contracting Officer may further request the Contractor or subcontractor to furnish additional information in the records of, or otherwise in the possession of or reasonably available to, the Contractor or subcontractor to justify the validity of any restrictive marking on technical data delivered or to be delivered under the contract or subcontract (e.g., a statement of facts accompanied with supporting documentation). The Contractor or subcontractor shall submit such written data as requested by the Contracting Officer within the time required or such

longer period as may be mutually agreed.

(2) If the Contracting Officer, after reviewing the written data furnished pursuant to paragraph (d)(1) of this clause, or any other available information pertaining to the validity of a restrictive marking, determines that reasonable grounds exist to question the current validity of the marking and that continued adherence to the marking would make impracticable the subsequent competitive acquisition of the item, component, or process to which the technical data relates, the Contracting Officer shall follow the procedures in paragraph (e) of this clause.

(3) If the Contractor or subcontractor fails to respond to the Contracting Officer's request for information under paragraph (d)(1) of this clause, and the Contracting Officer determines that continued adherence to the marking would make impracticable the subsequent competitive acquisition of the item, component, or process to which the technical data relates, the Contracting Officer may challenge the validity of the marking as described in paragraph (e) of this clause.

(e) Challenge.

(1) Notwithstanding any provision of this contract concerning inspection and acceptance, if the Contracting Officer determines that a challenge to the restrictive marking is warranted, the Contracting Officer shall send a written challenge notice to the Contractor or subcontractor asserting the restrictive markings. Such challenge shall-

- (i) State the specific grounds for challenging the asserted restriction;
- (ii) Require a response within sixty (60) days justifying and providing sufficient evidence as to the current validity of the asserted restriction;
- (iii) State that a DoD Contracting Officer's final decision, issued pursuant to paragraph (g) of this clause, sustaining the validity of a restrictive marking identical to the asserted restriction, within the three-year period preceding the challenge, shall serve as justification for the asserted restriction if the validated restriction was asserted by the same Contractor or subcontractor (or any licensee of such Contractor or subcontractor) to which such notice is being provided; and
- (iv) State that failure to respond to the challenge notice may result in issuance of a final decision pursuant to paragraph (f) of this clause.

(2) The Contracting Officer shall extend the time for response as appropriate if the Contractor or subcontractor submits a written request showing the need for additional time to prepare a response.

(3) The Contractor's or subcontractor's written response shall be considered a claim within the meaning of the Contract Disputes Act of 1978 (41 U.S.C. 601, et seq.), and shall be certified in the form prescribed at 33.207 of the Federal Acquisition Regulation, regardless of dollar amount.

(4) A Contractor or subcontractor receiving challenges to the same restrictive markings from more than one Contracting Officer shall notify each Contracting Officer of the existence of more than one challenge. The notice shall also state which Contracting Officer initiated the first in time unanswered challenge. The Contracting Officer initiating the first in time unanswered challenge after consultation with the Contractor or subcontractor and the other Contracting Officers, shall formulate and distribute a schedule for responding to each of the challenge notices to all interested parties. The schedule shall afford the Contractor or subcontractor an opportunity to respond to each challenge notice. All parties will be bound by this schedule.

(f) Final decision when Contractor or subcontractor fails to respond. Upon a failure of a Contractor or subcontractor to submit any response to the challenge notice, other than a failure to respond under a contract for commercial items, the Contracting Officer will issue a final decision to the Contractor or subcontractor in accordance with the Disputes clause of this contract pertaining to the validity of the asserted restriction. This final decision shall be issued as soon as possible after the expiration of the time period of paragraph (e)(1)(ii) or (e)(2) of this clause. Following issuance of the final decision, the Contracting Officer will comply with the procedures in paragraphs (g)(2)(ii) through (iv) of this clause.

(g) Final decision when Contractor or subcontractor responds.

(1) If the Contracting Officer determines that the Contractor or subcontractor has justified the validity of the restrictive marking, the Contracting Officer shall issue a final decision to the Contractor or subcontractor sustaining the validity of the restrictive marking, and stating that the Government will continue to be bound by the restrictive marking. This final decision shall be issued within sixty (60) days after receipt of the Contractor's or subcontractor's response to the challenge notice, or within such longer period that the Contracting Officer has notified the Contractor or subcontractor that the Government will require. The notification of a longer period for issuance of a final decision will be made within sixty (60) days after receipt of the response to the challenge notice.

(2) (i) If the Contracting Officer determines that the validity of the restrictive marking is not justified, the Contracting Officer shall issue a final decision to the Contractor or subcontractor in accordance with the Disputes clause of this contract.

Name of Offeror or Contractor:

Notwithstanding paragraph (e) of the Disputes clause, the final decision shall be issued within sixty (60) days after receipt of the Contractor's or subcontractor's response to the challenge notice, or within such longer period that the Contracting Officer has notified the Contractor or subcontractor of the longer period that the Government will require. The notification of a longer period for issuance of a final decision will be made within sixty (60) days after receipt of the response to the challenge notice.

(ii) The Government agrees that it will continue to be bound by the restrictive marking for a period of ninety (90) days from the issuance of the Contracting Officer's final decision under paragraph (g)(2)(i) of this clause. The Contractor or subcontractor agrees that, if it intends to file suit in the United States Claims Court it will provide a notice of intent to file suit to the Contracting Officer within ninety (90) days from the issuance of the Contracting Officer's final decision under paragraph (g)(2)(i) of this clause. If the Contractor or subcontractor fails to appeal, file suit, or provide a notice of intent to file suit to the Contracting Officer within the ninety (90)-day period, the Government may cancel or ignore the restrictive markings, and the failure of the Contractor or subcontractor to take the required action constitutes agreement with such Government action.

(iii) The Government agrees that it will continue to be bound by the restrictive marking where a notice of intent to file suit in the United States Claims Court is provided to the Contracting Officer within ninety (90) days from the issuance of the final decision under paragraph (g)(2)(i) of this clause. The Government will no longer be bound, and the Contractor or subcontractor agrees that the Government may strike or ignore the restrictive markings, if the Contractor or subcontractor fails to file its suit within one (1) year after issuance of the final decision. Notwithstanding the foregoing, where the head of an agency determines, on a nondelegable basis, that urgent or compelling circumstances will not permit waiting for the filing of a suit in the United States Claims Court, the Contractor or subcontractor agrees that the agency may, following notice to the Contractor or subcontractor, authorize release or disclosure of the technical data. Such agency determination may be made at any time after issuance of the final decision and will not affect the Contractor's or subcontractor's right to damages against the United States where its restrictive markings are ultimately upheld or to pursue other relief, if any, as may be provided by law.

(iv) The Government agrees that it will be bound by the restrictive marking where an appeal or suit is filed pursuant to the Contract Disputes Act until final disposition by an agency Board of Contract Appeals or the United States Claims Court. Notwithstanding the foregoing, where the head of an agency determines, on a nondelegable basis, following notice to the Contractor that urgent or compelling circumstances will not permit awaiting the decision by such Board of Contract Appeals or the United States Claims Court, the Contractor or subcontractor agrees that the agency may authorize release or disclosure of the technical data. Such agency determination may be made at any time after issuance of the final decision and will not affect the Contractor's or subcontractor's right to damages against the United States where its restrictive markings are ultimately upheld or to pursue other relief, if any, as may be provided by law.

(h) Final disposition of appeal or suit.

(1) If the Contractor or subcontractor appeals or files suit and if, upon final disposition of the appeal or suit, the Contracting Officer's decision is sustained-

(i) The restrictive marking on the technical data shall be cancelled, corrected or ignored; and

(ii) If the restrictive marking is found not to be substantially justified, the Contractor or subcontractor, as appropriate, shall be liable to the Government for payment of the cost to the Government of reviewing the restrictive marking and the fees and other expenses (as defined in 28 U.S.C. 2412(d)(2)(A)) incurred by the Government in challenging the marking, unless special circumstances would make such payment unjust.

(2) If the Contractor or subcontractor appeals or files suit and if, upon final disposition of the appeal or suit, the Contracting Officer's decision is not sustained-

(i) The Government shall continue to be bound by the restrictive marking; and

(ii) The Government shall be liable to the Contractor or subcontractor for payment of fees and other expenses (as defined in 28 U.S.C. 2412(d)(2)(A)) incurred by the Contractor or subcontractor in defending the marking, if the challenge by the Government is found not to have been made in good faith.

(i) Duration of right to challenge. The Government may review the validity of any restriction on technical data, delivered or to be delivered under a contract, asserted by the Contractor or subcontractor. During the period within three (3) years of final payment on a contract or within three (3) years of delivery of the technical data to the Government, whichever is later, the Contracting Officer may review and make a written determination to challenge the restriction. The Government may, however, challenge a restriction on the release, disclosure or use of technical data at any time if such technical data.

- (1) Is publicly available;
- (2) Has been furnished to the United States without restriction; or

(3) Has been otherwise made available without restriction. Only the Contracting Officer's final decision resolving a formal challenge by sustaining the validity of a restrictive marking constitutes "validation" as addressed in 10 U.S.C. 2321.

(j) Decision not to challenge. A decision by the Government, or a determination by the Contracting Officer, to not challenge the restrictive marking or asserted restriction shall not constitute "validation."

(k) Privity of contract. The Contractor or subcontractor agrees that the Contracting Officer may transact matters under this clause directly with subcontractors at any tier that assert restrictive markings. However, this clause neither creates nor implies privity of contract between the Government and subcontractors.

(l) Flowdown. The Contractor or subcontractor agrees to insert this clause in contractual instruments with its subcontractors or suppliers at any tier requiring the delivery of technical data, except contractual instruments for commercial items or commercial components.

- (xxii)hydrobromofluorocarbons (HBFCs)
- (xxiii)All isomers of the substances listed in this paragraph (a)(1) except for 1,1,2-trichloroethane, which is an isomer of methyl chloroform.

(2) Directly requires the use of CIODS means that the Government's specification or technical data package, at any tier, explicitly requires the use of any Class I Ozone-Depleting Substance (CIODS) in performance of the contract.

(3) Indirectly requires the use of CIODS means that the Government's specification or technical data package, while not explicitly requiring the use of any CIODS, does require a feature that you can meet or produce only by the use of CIODS.

(b) Per Section 326 of Public Law 102-484, the Department of Defense cannot award any contract that directly or indirectly requires the use of CIODS unless (i) the use of such substances is essential for contract performance, and (ii) no suitable substitute for the CIODS currently is available.

(c) Before releasing this solicitation, we conducted a best effort review of its technical requirements, standards, and specifications, to see if any contain requirements for CIODS. If we identified any such CIODS requirements, they are identified in subparagraph (d)(1) below.

(1) In addition, to help TACOM meet its obligations under Public Law 102-484, we ask you for input. If you have any special knowledge about any CIODS requirements that our specifications impose, whether directly or indirectly, or if you know about potential

substitutes for any CIODS required by our specifications, we would appreciate the information.

(2) It should be understood that you are not obligated to give us the information requested by this provision, and that we cannot provide any separate or special payment for doing so. However, we are asking only for information based on knowledge that is readily available to you as a supplier in this industry. We do not expect you to do any review of our specifications more extensive than the one you perform in order to develop your price.

(d) Please summarize your own review of our specification/technical data package, by completing the following:

- (1) During our review of the specification or technical data package in this solicitation, we--
- [] have
- [] have not

found any direct requirements to use any CIODS. (If have is checked above, offerors are asked to identify, on the following lines, (i) any specifications and standards not already listed immediately below that directly require the use of CIODS; (ii) the CIODS required by the listed specifications and standards; and (iii) whether any substitutes are known to be available for the listed CIODS.)

<u>Spec/Standard</u>	<u>Required CIODS</u>	<u>Substitute Available?</u>
_____	_____	_____
_____	_____	_____

- (2) Further, in our review of the specification or technical data package in this solicitation, we--
- [] have
- [] have not

found any indirect requirements to use any CIODS. (Offerors who check have above are asked to identify, on the following lines, (i) the specifications and standards for this acquisition that indirectly require the use of CIODS; (ii) the CIODS indirectly required by each listed specification and standard; and (iii) whether any substitutes are known to be available for the listed CIODS.)

<u>Spec/Standard</u>	<u>Required CIODS</u>	<u>Substitute Available?</u>
_____	_____	_____
_____	_____	_____

(e) Offerors who check have in paragraphs (d)(1) or (2) above also are requested to say whether substitutes are known to be available for any of the CIODS. If an available substitute would perform less well than the CIODS would perform, please let us know what the technical trade-offs are to the extent that you have such information available.

(f) If you checked have in paragraphs (d)(1) or (2) above, and also indicated that substitutes for CIODS are available, we need to know whether use of the suggested substitute would have any effect on your proposed price. If your proposal price for compliance with our current specifications differs from what your price would be if the substitute for CIODS were required, we ask that you let us know what the difference would be in Section B of this solicitation, by giving us two prices or offers:

- One price/offer, labeled with CIODS, will be the offered price in the event that CIODS are used.
- The second price/offer, labeled without CIODS, will be the price offered if substitutes for CIODS are used, and will specify the substitute(s) being proposed for use.

(g) Section 326 of Public Law 102-484 reflects the national and international interest in minimizing the use of CIODS. For this reason, TACOM reserves the right to (i) determine the suitability of substitutes for CIODS when such potential substitutes are available; and (ii) change the specification in any contract awarded as a result of this solicitation, to require the use of suitable substitutes in lieu of CIODS.

L-10 52.215-4404 DATA AND COMMUNICATIONS SUBMITTED TO THE GOVERNMENT ELECTRONICALLY MAY/2002

For your datafax, use the same subject line as that for e-mails as indicated above: "OFFER--[solicitation number], [name of your Company/offeror], CLOSES [closing date]".

Please select only one medium by which to transmit each offer. For instance, do not submit an offer via 100 or 250 megabyte Zip*-disk AND e-mail.
